

## What is the Product?

### *FlexPower™ Joint and Muscle Pain Cream*

## What is it used for?

- Soothes sore or painful muscles and joints without smelling like medicine

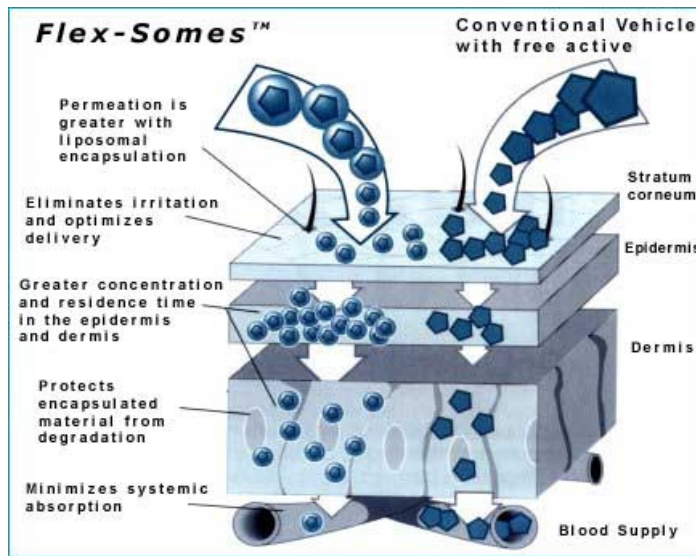

## What's Nano about it?

- Tiny liposomes that are 90 nanometers long (FlexSomes™) can penetrate deep into skin to soothe away muscle pain.

## How does it work?

- Tiny but complex fat-like spheres (liposomes) completely surround the nutrients and pharmaceutical ingredients in the cream to form a ball that can penetrate deep into skin to soothe away muscle pain.
- FlexPower™'s nano-sized liposomes can reach the muscle tissue to soothe pain. Other creams do not have these tiny liposomes and their ingredients cannot reach the muscles as well.
- Irritates less, but delivers more medicine.

# How FlexPower™ says it works

## Does it have other applications?

No

## Price:

- The cost is \$19.95 per jar

## Glossary

- Liposome: highly complex microscopic balls of a fat-like substance
