

VIRTUAL NANOSCIENCE PROFESSIONAL DEVELOPMENT WORKSHOP

- for high school teachers!

Workshop is free!
Classroom kits will be
mailed to every teacher!
16 clock hours!

Virtual Activities will
take place the weeks
of July 5, July 12, July
19, and July 26

Nanoscience is revolutionizing the fields of chemistry, biology, physics, earth science, and engineering! Nanomaterials that are 1-100 nanometers in length act much differently than their larger counterparts and, as a result are quite useful in tackling scientific problems of this age. Our interactive, hands-on, professional development workshop will expose you to the wild (and tiny) world of nanoscience and nanotechnology! You will get resources for your classroom and will learn fun and relevant activities to engage your students in the future of science!

Registration deadline is June 26th. Upon registration, teachers will be given information on how to join the Workshop in Slack. Set up your account and say hello to the group to confirm your registration by June 30th and receive your kit!
